It's the biggest installation to date of a long-duration energy storage (LDES) technology at a US military site. Lockheed Martin expects to break

Lockheed Martin Corp. has pledged to remove Anthropic's Claude AI tools from its operations after President Donald Trump imposed a federal agency-wide ban on the company, with a

When you think Lockheed Martin, fighter jets and space exploration might come to mind faster than battery racks. But here's the plot twist - this aerospace titan is quietly becoming a heavyweight in

Lockheed Martin and D-Wave will collaborate to realize the benefits of a computing platform based upon a quantum annealing processor, as applied to some of

PROJECT SUMMARY Lockheed Martin Energy delivered an 8.5 MWh GridStar(R) Lithium system to energy storage developer, Convergent Energy + Power. The system was installed to help Husky

Lockheed Martin has been awarded a contract to build the first megawatt-scale, long-duration energy storage system for the U.S. Department of Defense. GridStar(R) Flow will be installed

The Hybrid Flow Battery (HFB) market is experiencing significant growth, driven by the increasing demand for renewable energy storage solutions and advancements in battery technology.

Lockheed Martin has been selected to build the U.S. military's first long-duration energy storage system. The defense contractor's redox flow

The systems are certified to UL 9540 standards, a key certification for product safety for energy storage systems and equipment. Lockheed Martin

Lockheed Martin's first customer-sited production system is intended as a demonstration unit for the Army

Lockheed martin energy storage

and ERDC-CERL. This system will be

PROJECT SUMMARY Lockheed Martin Energy installed a 1MW, 1.4MWh GridStar(R) Lithium energy storage system at one of the company's manufacturing facilities in Syracuse, New York to reduce

Lockheed Martin has told Energy-Storage.News that while the company wants its energy storage systems to support the adoption of

An eight-hour duration Lockheed Martin flow battery energy storage system will be deployed at a 102.5MW solar PV project in Canada.

As renewable energy adoption accelerates globally, one critical question emerges: How can we efficiently store clean energy for consistent availability? Traditional lithium-ion batteries struggle with

Lockheed Martin's GridStar Lithium is a containerized, turnkey energy storage platform combining battery cells, thermal management, power electronics, control systems, and software.
